# United States Patent Office.

FRANCIS PETERS AND GEORGE CLEM, OF CINCINNATI, OHIO.

Letters Patent No. 90,298, dated May 18, 1869.

## IMPROVEMENT IN PRIVY-SEATS.

The Schedule referred to in these Letters Patent and making part of the same.

### To whom it may concern:

Be it known that we, FRANCIS PETERS and GEORGE CLEM, both of Cincinnati, Hamilton county, Ohio, have invented a new and useful Privy-Seat, of which the following is a full, clear, and exact description, reference being had to the accompanying drawings, making part of this specification.

This invention relates to a device which renders it impossible for the user to stand upon the privy-seat; and consists in the provision of rollers on the top of the seat, which, although affording a secure and convenient seat, yet, in the event of an attempt to stand upon them, will revolve, and precipitate the user on to the floor.

Figure 1 is a perspective view of a privy-seat embodying our improvement.

Figure 2 is a vertical section thereof, from front to rear.

A represents the box, having one or more pairs of standards, B, which afford journal bearing for a roller, C, over the front edge of the box, and, where necessary, of side rollers C' C' and a back roller, C".

These rollers, while circular in transverse section, may have the represented or any other longitudinal contour, but are preferably somewhat hollowed toward their mid-length, as shown.

We claim herein as new, and of our invention—

One or more rollers, constituting a privy-seat, substantially as and for the purpose designated.

In testimony of which invention, we hereunto set our hands.

FRANCIS PETERS.  
G. CLEM.
